Date: 2024-12-19

Task Name: Basic and Advanced Data Manipulation with NumPy

Task Number: 20
Part: Advanced NumPy

Module: Python Programming Language for AI / ML

Submit Number: 1

Description:

In this task, students will work with basic and advanced NumPy techniques. They will create, manipulate, and perform mathematical operations on NumPy arrays. The task also focuses on reshaping arrays, using Boolean indexing, and applying universal functions (ufuncs) for data analysis.

Requirements:

- 1. Requirement 1: Creating and Manipulating NumPy Arrays
 - Description:

Students will create NumPy arrays from different data types (integers, floats, Booleans) and perform basic arithmetic operations (addition, subtraction, multiplication).

- 2. Requirement 2: Advanced Array Manipulation
 - o Description:

Students will practice reshaping arrays and using Boolean indexing to filter array elements.

- 3. Requirement 3: Mathematical and Statistical Operations
 - o Description:

Students will perform operations such as sum, mean, min, max, and other aggregation methods using NumPy.

🗸 📌 1. Requirement 1

Task Name: Creating and Manipulating NumPy Arrays.

Description: Students will create NumPy arrays from different data types (integers, floats, Booleans) and perform basic arithmetic operations (addition, subtraction, multiplication).

```
1 import numpy as np
2 # Creating a NumPy arrays from different datatypes (integers, floats, Booleans)
3 int_numpy_array = np.array([1, 2, 3, 4])
 4 float_numpy_array = np.array([1.5, 2.5, 3.5, 4.5])
 5 bool_numpy_array = np.array([True, False, True, False])
7 # Performing basic arithmetic operations (addition, subtractionm, multiplication)
8 # Addition
9 summition_array = int_numpy_array + float_numpy_array
10 # Subtraction
11 subtraction_array = int_numpy_array - float_numpy_array
12 # Multiplication
13 multiplication_array = int_numpy_array * float_numpy_array
15 division_array = int_numpy_array / float_numpy_array
17 # Acessing elemnts from array (indexing)
                                               #----> Accessing the second element in the int numpy array
18 element_one_int = int_numpy_array[1]
19 element_one_float = float_numpy_array[0]
                                               #----> Accessing the first element in the float_numpy_array
                                             #----> Accessing the third element in the bool_numpy_array
20 element_one_bool = bool_numpy_array[2]
22 # Displaying the results
23 print("int_numpy_array:", int_numpy_array)
24 print("float_numpy_array:", float_numpy_array)
```

```
25 print("bool_numpy_array:", bool_numpy_array)
26 print("summition_array:", summition_array)
27 print("subtraction_array:", subtraction_array)
28 print("multiplication_array:", multiplication_array)
29 print("division_array:", division_array)
30 print("element_one_int:", element_one_int)
31 print("element_one_float:", element_one_float)
32 print("element_one_bool:", element_one_bool)
→ int_numpy_array: [1 2 3 4]
    float_numpy_array: [1.5 2.5 3.5 4.5]
bool_numpy_array: [ True False True False]
     summition_array: [2.5 4.5 6.5 8.5]
     subtraction_array: [-0.5 -0.5 -0.5 -0.5]
     multiplication_array: [ 1.5 5. 10.5 18. ]
     division_array: [0.66666667 0.8
                                             0.85714286 0.88888889]
     element_one_int: 2
     element_one_float: 1.5
     element_one_bool: True
```

🗸 📌 2. Requirement 2

Task Name: Advanced Array Manipulation.

Description: Students will practice reshaping arrays and using boolean indexing to filter array elements.

```
1 # Reshaping arrays
  2 \ \text{reshaped\_array\_34} \ = \ \text{np.array}([1, \ 2, \ 3, \ 4, \ 5, \ 6, \ 7, \ 8, \ 9, \ 10, \ 11, \ 12]). \\ \text{reshape}(3, \ 4) \ \# \ \text{Reshaping into a 3x4 array } ) 
 3 reshaped_array_43 = np.array([1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12]).reshape(4, 3) # Reshaping into a 4x3 array
 4 reshaped_array_2 = reshaped_array_34.reshape(2, -1)
                                                                                           # Reshaping into a 2x? array (automatically determine
 6 # Stacking arrays (Vertical Stack and Horizontal Stack)
 7 vstack_array = np.vstack([reshaped_array_34, reshaped_array_34])
 8 hstack_array = np.hstack([reshaped_array_43, reshaped_array_43])
10 # Splitting arrays (Split into 3 equal parts)
11 split_array = np.split(reshaped_array_34, 3)
                                                           # Splitting reshaped_array into 3 parts
12
13 # Boolean indexing (Filter elements greater than 5)
14 filtered_array = reshaped_array_34[reshaped_array_34 > 5] # Filtering elements greater than 5 and less than 10
15
16 # Displaying results
17 print("\nReshaped Array (3x4):")
18 print(reshaped_array_34)
19 print("\nReshaped Array (4x3):")
20 print(reshaped array 43)
21 print("\nReshaped Array (2x?):")
22 print(reshaped_array_2)
24 print("\nVertically Stacked Array:")
25 print(vstack_array)
26 print("\nHorizontally Stacked Array:")
27 print(hstack_array)
28 print("\nSplit Array (3 parts):")
29 print(split_array)
30 print("\nFiltered Array (elements greater than 5):")
31 print(filtered_array)
\overline{z}
     Reshaped Array (3x4):
     [[ 1 2 3 4]
      [5 6 7 8]
     [ 9 10 11 12]]
     Reshaped Array (4x3):
     [[ 1 2 3]
     [ 4 5 6]
      7 8 9]
     [10 11 12]]
     Reshaped Array (2x?):
     [[ 1 2 3 4 5 6]
     [ 7 8 9 10 11 12]]
     Vertically Stacked Array:
     [[ 1 2 3 4]
      [5678]
```

```
[ 9 10 11 12]
[ 1  2  3   4]
[ 5  6  7   8]
[ 9 10 11 12]]

Horizontally Stacked Array:
[[ 1  2  3  1  2   3]
[ 4  5  6  4  5   6]
[ 7  8  9  7  8   9]
[ 10 11 12 10 11 12]]

Split Array (3 parts):
[array([[1, 2, 3, 4]]), array([[5, 6, 7, 8]]), array([[ 9, 10, 11, 12]])]

Filtered Array (elements greater than 5):
[ 6  7  8   9 10 11 12]
```

3. Requirement 3

Task Name: Mathematical and Statistical Operations.

Description: Students will perform operations such as sum, mean, min, max, and other aggregation methods using NumPy.

```
1 # Performing sum, mean, min, max, etc., using NumPy
   2 array_for_operations = np.array([1, 2, 3, 4, 5, 6, 7, 8, 9, 10])
   4 total_sum = np.sum(array_for_operations) # Sum of elements
   5 mean_value = np.mean(array_for_operations) # Mean of elements
   6 min_value = np.min(array_for_operations) # Minimum value
  7 max_value = np.max(array_for_operations) # Maximum value
   8 std_dev = np.std(array_for_operations) # Standard deviation
   9 # Another way to calculate STD
\textbf{10} \ \mathsf{std\_dev\_another\_way} = \mathsf{np.sqrt}(\mathsf{np.sum}((\mathsf{array\_for\_operations}\ - \ \mathsf{np.mean}(\mathsf{array\_for\_operations}))) \\ *2/\mathsf{len}(\mathsf{array\_for\_operations}))) \\ \mathsf{np.mean}(\mathsf{np.sum}((\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}(\mathsf{np.sum}
11
12 # Displaying results
13 print("\nMathematical and Statistical Operations:")
14 print("Total Sum:", total_sum)
15 print("Mean Value:", mean_value)
16 print("Minimum Value:", min_value)
17 print("Maximum Value:", max_value)
18 print("Standard Deviation:", std_dev)
19 print("Standard Deviation (Another Way):", std_dev_another_way)
                  Mathematical and Statistical Operations:
                  Total Sum: 55
                  Mean Value: 5.5
                  Minimum Value: 1
                  Maximum Value: 10
                  Standard Deviation: 2.8722813232690143
                  Standard Deviation (Another Way): 2.8722813232690143
```
